

# Assessment & Planning

Understanding risk, need & impact

Why is it important?

- To reduce socio-economic losses
- To predict trends and be disaster & climate resilient
- Disaster preparedness requires customised solutions

What we do?

- Risk assessments and communication plans
- Disaster management and climate adaptation plans
- Community based disaster risk management
- Mainstreaming disaster risk reduction in development

How we add value?

- Adoption of process-oriented participatory approach
- Alignment with global goals and standards
- Huge network of partners
